

Qualifications Pack For Transmission Engineer

Job Details	Qualifications Pack Code	TEL/Q6203		
	Job Role	Transmission Engineer		
	Credits NSQF	6	Version number	1.0
	Sector	Telecom	Drafted on	26/04/13
	Sub-sector	Network Managed Services	Last reviewed on	29/04/15
	Occupation	Network Operations and Maintenance	Next review date	31/05/17
	NSQF Clearance on	20 – 07 - 2015		

Job Role	Transmission Engineer
Role Description	Transmission Engineer is responsible for maintaining uptime and quality of the network (both media & equipment) segment assigned to him by undertaking periodic preventive maintenance activities. He is to also ensure effective fault management in case of fault occurrence and periodic upgrades, capacity augmentation of transmission network as per transmission plan with no/ minimal disruption of services
NSQF level	6
Minimum Educational Qualifications*	Diploma
Maximum Educational Qualifications*	Bachelor in Technology (Electronics, Computer Science, IT..... and related field)
Training	Training on Transmission Network Management System; Company specific trainings (equipment and software) based on make of transmission equipments deployed
Minimum Job Entry Age	24 Years
Experience	Worked as LOS surveyor for minimum 2-3 years
Applicable National Occupational Standards (NOS)	<p>Click to open the below hyperlinks</p> <p>Compulsory:</p> <ol style="list-style-type: none"> 1. TEL/N6212 (Coordinate preventive maintenance of Transmission nodes) 2. TEL/N6213 (Coordinate fault management of Transmission nodes) 3. TEL/N6214 (Undertake upgrade, capacity augmentation and addition/ deletion of new nodes in Transmission network) <p>Optional:</p> <ol style="list-style-type: none"> 4. NA
Performance Criteria	As described in the relevant OS units

Qualifications Pack For Transmission Engineer

Definitions	Keywords /Terms	Description
	Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
	Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
	Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
	Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
	Job Role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
	OS	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
	Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
	NOS	NOS are Occupational Standards which apply uniquely in the Indian context.
	Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
	Qualifications Pack	Qualifications Pack comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
	Unit Code	Unit Code is a unique identifier for an Occupational Standard , which is denoted by an 'N'.
	Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
	Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
	Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
	Organizational Context	Organizational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
	Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
	Core Skills or Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS , these include communication related skills that are applicable to most job roles.

Qualifications Pack For Transmission Engineer

Acronyms	Keywords /Terms	Description
	BTS	Base Transceiver Station
	FM Engineer	Field Maintenance Engineer
	IF cable	Intermediate Frequency cable
	MMU	Man-Machine Unit
	OHS	Organizational Health & Safety
	RF cable	Radio Frequency Cable
	SHE	Safety, Health & Environment
	IN	Intelligent Network
	VAS	Value Added Services
	BSC	Base Station Controller
	MUX	Multiplexer
	SDH	Synchronous Digital Hierarchy
PDH	Plesiochronous digital hierarchy

National Occupational Standard

Overview

This unit is about carrying out preventive maintenance of transmission nodes to ensure network availability and high quality network transmission

Coordinate preventive maintenance of Transmission nodes

Unit Code	TEL/N6212
Unit Title (Task)	Coordinate preventive maintenance of Transmission nodes
Description	This unit is about carrying out preventive maintenance of transmission nodes to ensure network uptime and high quality network transmission
Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> • Obtain preventive maintenance schedule • Coordinate preventive maintenance of transmission nodes (microwave and optical nodes) • Reporting and documenting the status at the end of scheduled activity
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Obtain schedule & notify NOC	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure maintenance of site folder containing site capacity, topology and spots (microwave frequency used)</p> <p>PC2. obtain the preventive maintenance schedule and the corresponding checklist from the supervisors</p> <p>PC3. obtain network reports of the previous day from OSS and review network performance on defined parameters</p> <p>PC4. suggest appropriate changes to the planned maintenance schedule considering criticality, capacity, frequency of fading faults, configuration changes</p> <p>PC5. assess the potential impact of the proposed maintenance on customers and network and plan for possible outage or deferral of maintenance</p> <p>PC6. ensure Network Operating Centre (NOC) is notified prior to undertaking the maintenance activities</p>
	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure necessary tools and test equipments are available with the field team</p> <p>PC2. ensure that equipment specific software are installed in the laptop device of field team</p> <p>PC3. ensure that the software versions are current and ready to use</p> <p>PC4. ensure availability of spare hardware equipments like radio, microwave, fiber and raise request for spares, in case the same are not available</p> <p>PC5. ensure that faulty equipments are sent to logistics team for repair and replacement</p>
Arrange for tools and spares	

Coordinate preventive maintenance of Transmission nodes

<p>Conduct/ Co-ordinate maintenance activity</p>	<p>PC6. conduct/ coordinate performance of maintenance activities on periodic basis (monthly, quarterly, half yearly)</p> <p>PC7. obtain performance dump of the transmission nodes from the NOC team and monitor signal strength, CRCbit error percentage, and other KPIs</p> <p>PC8. optimize signal parameters to ensure that they stay within the designed values</p> <p>PC9. review media errors in transmission</p> <p>PC10. ensure adequacy of redundancy for critical network elements like - IN/ Core/ BSC/ VAS nodes</p> <p>PC11. ensure completion of maintenance activities like antenna re-alignment, checking of connectors of IF, RF cables at BSS location by coordinating with the FM engineers</p> <p>PC12. ensure remote support is provided to the field team/ FM engineers while the change activities are carried out</p> <p>PC13. ensure timely completion of maintenance activity by monitoring activities performed by the field engineers</p> <p>PC14. ensure compliance to enterprise policy while escalating instances of delays</p>
<p>Test effectiveness & close activity</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. confirm effectiveness of the maintenance process, by monitoring site's alarm status in co-ordination with the NOC team</p> <p>PC2. ensure completion of administrative jobs like site clearance, return of test equipments</p>
<p>Health and Safety</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure compliance with site risk control, OHS, environmental and quality requirements as per company's norms</p> <p>PC2. ensure that work is carried out in accordance to the level of competence and legal requirements</p> <p>PC3. ensure that hazards associated with the workplace that have not been previously controlled, are reported in accordance with appropriate procedures</p> <p>PC4. ensure compliance with all organizational security arrangements (like using valid ID cards) and approved procedures</p> <p>PC5. use and maintain protective equipment according to work requirements</p> <p>PC6. ensure availability of first aid box at site</p> <p>PC7. ensure escalation of safety incidents to relevant authorities as per guidelines</p>
<p>Report & Record</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure all relevant parties (including BSS/ BTS support engineer, NOC team, other supervisors) are notified of the results of the maintenance activities and</p>

Coordinate preventive maintenance of Transmission nodes

	<p>the sign-off is obtained from relevant personnel</p> <p>PC2. ensure that documents that are required to be updated are identified</p> <p>PC3. ensure completion of routine maintenance logs, activity logs and spare tracker within stipulated timelines</p> <p>PC4. ensure that documents are available to all appropriate authorities to inspect</p>
Knowledge and Understanding (K)	
<p>A. Organizational Context (Knowledge of the company / organization and its processes)</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. risk and impact of not following defined procedures/work instructions</p> <p>KA2. escalation matrix for reporting identified incidents, troubles and/ or emergencies e.g. system failures ,fire and power failures</p> <p>KA3. types of documentation in organization and importance of the same</p> <p>KA4. records to be maintained and implications of non-maintenance of the same</p> <p>KA5. process for obtaining sign-off post completion of the maintenance activities</p> <p>KA6. knowledge of spare management and repair & return process for faulty equipments</p> <p>KA7. SHE and OHS guidelines and regulations as per company's norms</p> <p>KA8. protection equipments (anti-static bands, anti-static packaging, appropriate insulations) that are required to be used</p> <p>KA9. first aid requirements in case of electrical shocks, cuts, fall from height and other common injuries</p> <p>KA10. electrical hazards and precautionary measures</p> <p>KA11. usage of fire safety equipments</p>
<p>B. Technical Knowledge</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KB1. network topology like ring structure, daisy chain structure and their traffic handling capabilities and characteristics</p> <p>KB2. functionality of telecommunication network transmission nodes like transmission equipments (Multiplexers, Microwave radio - TDM and IP based); transmission medium (Optical and microwave), transmission technology (SDH and PDH)</p> <p>KB3. functionality of transmission media test equipment (Optical light meter, power meter, Optical Time Domain Reflectometer - OTDR)</p> <p>KB4. equipment specific O&M softwares like MiniLink for Ericsson, NEC Passo</p> <p>KB5. cables (RJ45, RS232, and Hi-Speed USB) to login to MMU/ IDU cards</p> <p>KB6. knowledge of Optical fiber characteristics like refraction, polarization, attenuation, dispersion</p> <p>KB7. bands in optical fibre and their usability, loss characteristics</p> <p>KB8. signal strength and quality KPIs – design values and margins</p> <p>KB9. transmission Network Monitoring System</p> <p>KB10. fresnel zone analysis (LOS survey) and microwave survey</p>

Coordinate preventive maintenance of Transmission nodes

	KB11. standard troubleshooting activities that are performed at transmission nodes
Skills (S)	
A. Core Skills/ Generic Skills	Communication Skills
	The user/ individual on the job needs to know and understand how to:
	SA1. liaise and coordinate with third party vendors SA2. communicate with supervisor SA3. communicate in the local language
	Project Management Skills
	The user/individual on the job needs to know and understand how to:
	SA4. prioritize and execute tasks in a high-pressure environment and handle high pressure situations SA5. handle multiple tasks and completing them successfully within due timelines SA6. use and maintain resources efficiently and effectively
	Analytical Skills
The user/individual on the job needs to know and understand how to:	
SA7. keep up to date with new technology SA8. interpret reports, readings and numerical data SA9. think through to address complex problems SA10. source technical information by researching enterprise website or manufacturer's technical documentation	
Other Skills	
The user/individual on the job needs to know and understand how to:	
SA11. maintain security of site records and other confidential data SA12. create and maintain effective working relationships and team environment SA13. take initiatives and progressively assume increased responsibilities SA14. share knowledge with other team members and colleagues	
B. Professional Skills	Equipment operating Skills
	The user/individual on the job needs to know and understand how to:
	SB1. operate transmission equipments like Microwave (TDM and IP based) radio, multiplexers, antennas and work on SDH and PDH transmission technology SB2. operate equipment specific O&M softwares like MiniLink for Ericsson, NEC Passo SB3. utilize appropriate fiber like single mode and multi mode optical fibre based on

Coordinate preventive maintenance of Transmission nodes

	specific requirements
	SB4. utilize appropriate optical test equipments like OTDR, power meter, light meter based on test requirements
	SB5. connect appropriate login cables (RJ45, RS232, and Hi-Speed USB) to log on to the transmission nodes
	SB6. re-route traffic in case of link failure
	SB7. perform Fresnel zone/ Microwave survey and prepare survey reports in an appropriate manner
	SB8. provision STMs and E1s in appropriate way
	Technical interpretation Skills
	The user/individual on the job needs to know and understand how to:
	SB9. interpret OTDR, power meter, light meter test results to localize faults
	SB10. interpret results of LOS/ Fresnel zone surveys
	SB11. analyze transmission performance reports and identify instances of signal attenuation/ fading
	SB12. interpret optical connectivity/ link testing results to ensure link margins

National Occupational Standard

Overview

This unit is about carrying out corrective maintenance/ fault management at transmission nodes to ensure network availability and high quality network transmission

Unit Code	TEL/N6213
Unit Title (Task)	Coordinate corrective maintenance/ fault management of transmission nodes
Description	This unit is about carrying out corrective maintenance/ fault management at transmission nodes to ensure network availability and high quality network transmission
Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> • Ensure timely response to the network alarms/ NOC instructions • Carry out diagnostic tests and coordinate with NOC in case of fibre failure • Rectify fault condition or escalate in case additional technical support is required • Reporting and documenting the status of the activity
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Respond to Network Alarm/ NOC instructions	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. obtain alarm information from the NOC team and determine alarm severity, SLAs and the affected network elements</p> <p>PC2. ensure understanding of nature of alarms, and provide information to/ seek advice from relevant parties to identify the problem and root-cause of the alarm</p> <p>PC3. analyze network topology and prioritise actioning on alarms based on their service impact</p>
Arrange for tools and spares	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure necessary tools and test equipments are available with the field team</p> <p>PC2. ensure that equipment specific software are installed in the laptop device of the field team</p> <p>PC3. ensure that the software versions are current and ready to use</p> <p>PC4. ensure availability of spare hardware equipments like radio, microwave, fiber and raise request for spares, in case the same are not available</p> <p>PC5. ensure that faulty equipments are sent to logistics team for repair and replacement</p>
Identify & rectify faults	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure coordination with the field engineers for performance of fault correction activity at transmission nodes</p>

	<p>PC2. based on the alarm/ other indicators determine the fault details</p> <p>PC3. in case optical fiber faults, ensure coordination with optical NOC to rectify the fault</p> <p>PC4. ensure in coordination with the NOC team that traffic is re-routed in case of transmission system failures</p> <p>PC5. in case of non-fibre alarm coordinate with the field engineers to diagnose the root cause of alarm</p> <p>PC6. determine the options to rectify the fault and confirm with supervisors and fibre NOC if required</p> <p>PC7. ensure a contingency plan is in place to handle transmission system failures</p> <p>PC8. ensure timely completion of fault rectification by monitoring activities performed by the field engineers</p> <p>PC9. ensure compliance to enterprise policy while escalating unresolved faults/ instances of delays</p>
<p>Test effectiveness & close activity</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. confirm effectiveness of the maintenance process, by monitoring site's alarm status in co-ordination with the NOC team</p> <p>PC2. ensure completion of administrative jobs like site clearance, return of test equipments</p>
<p>Health and Safety</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC3. ensure compliance with site risk control, OHS, environmental and quality requirements as per company's norms</p> <p>PC4. ensure that work is carried out in accordance to the level of competence and legal requirements</p> <p>PC5. ensure that hazards associated with the workplace that have not been previously controlled, are reported in accordance with appropriate procedures</p> <p>PC6. ensure compliance with all organizational security arrangements (like using valid ID cards) and approved procedures</p> <p>PC7. use and maintain protective equipment according to work requirements</p> <p>PC8. ensure availability of first aid box at site</p> <p>PC9. ensure escalation of safety incidents to relevant authorities as per guidelines</p>
<p>Report & Record</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure all relevant parties (including BSS/ BTS support engineer, NOC team, other supervisors) are notified of the results of the fault management/ corrective maintenance activities and the sign-off is obtained</p> <p>PC2. ensure that documents that are required to be updated are identified</p>

	<p>PC3. ensure completion of routine maintenance logs, activity logs and spare tracker within stipulated timelines</p> <p>PC4. ensure that documents are available to all appropriate authorities to inspect</p>
Knowledge and Understanding (K)	
<p>A. Organizational Context (Knowledge of the company / organization and its processes)</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. risk and impact of not following defined procedures/work instructions</p> <p>KA2. escalation matrix for reporting identified incidents, troubles and/ or emergencies e.g. system failures ,fire and power failures</p> <p>KA3. types of documentation in organization and importance of the same</p> <p>KA4. records to be maintained and implications of non-maintenance of the same</p> <p>KA5. process for obtaining sign-off post completion of the maintenance activities</p> <p>KA6. knowledge of spare management and repair & return process for faulty equipments</p> <p>KA7. SHE and OHS guidelines and regulations as per company's norms</p> <p>KA8. protection equipments (anti-static bands, anti-static packaging, appropriate insulations) that are required to be used</p> <p>KA9. first aid requirements in case of electrical shocks, cuts, fall from height and other common injuries</p> <p>KA10. electrical and chemical related hazards and precautionary measures</p> <p>KA11. usage of fire safety equipments</p>
<p>B. Technical Knowledge</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KB1. network topology like ring structure, daisy chain structure and their traffic handling capabilities and characteristics</p> <p>KB2. functionality of telecommunication network transmission nodes like transmission equipments (Multiplexers, Microwave radio - TDM and IP based); transmission medium (Optical and microwave), transmission technology (SDH and PDH)</p> <p>KB3. functionality of transmission media test equipment (Optical light meter, power meter, Optical Time Domain Reflectometer - OTDR)</p> <p>KB4. equipment specific O&M softwares like MiniLink for Ericsson, NEC Passo</p> <p>KB5. cables (RJ45, RS232, and Hi-Speed USB) to login to MMU/ IDU cards</p> <p>KB6. knowledge of Optical fiber characteristics like refraction, polarization, attenuation, dispersion</p> <p>KB7. bands in optical fibre and their usability, loss characteristics</p> <p>KB8. signal strength and quality KPIs – design values and margins</p> <p>KB9. transmission Network Monitoring System</p> <p>KB10. fresnel zone analysis (LOS survey) and microwave survey</p> <p>KB11. standard troubleshooting activities that are performed at transmission nodes</p> <p>KB12. knowledge of alarm types, resolution and remedy SLAs and escalation matrix</p>

	KB13. implications for non response to tickets within defined SLAs
Skills (S)	
A. Core Skills/ Generic Skills	Communication Skills
	The user/ individual on the job needs to know and understand how to:
	SA1. liaise and coordinate with third party vendors SA2. communicate with supervisor SA3. communicate in the local language
	Project Management Skills
	The user/individual on the job needs to know and understand how to:
	SA4. prioritize and execute tasks in a high-pressure environment and handle high pressure situations SA5. handle multiple tasks and completing them successfully within due timelines SA6. use and maintain resources efficiently and effectively

National Occupational Standard

Overview

This unit is about carrying out change management activities (system upgrade/ transmission capacity augmentation/ re-alignment etc.) for transmission nodes

TEL/N6214

Undertake upgrade, capacity augmentation and addition/ deletion of new nodes in Transmission network

I Occupational Standard

Unit Code	TEL/N6214
Unit Title (Task)	Undertake upgrade, capacity augmentation and addition/ deletion of new nodes in Transmission network
Description	This unit is about carrying out change management activities (system upgrade/ transmission capacity augmentation/ re-alignment etc.) for transmission nodes
Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> • Ensure timely response to the change work orders • Implement change work order and test effectiveness of change • Reporting and documenting the status
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Determine change/ configuration requirements	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. receive change requests from the relevant teams (NOC, change management, network planning team etc.)</p> <p>PC2. identify criticality and timelines for carrying out the changes</p> <p>PC3. develop work plan and identify dependencies if any</p> <p>PC4. assess the potential impact of the proposed activity and plan for possible outage condition or deferral of the activity</p> <p>PC5. ensure that Network Operating Centre (NOC) is notified prior to undertaking the change activities</p>
Arrange for tools and spares	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure availability of necessary tools and test equipments with the field team</p> <p>PC2. ensure availability of spare hardware equipments like radio, microwave, fiber etc. and raise request for spares, in case the same are not available</p> <p>PC3. ensure that the login user id and password to the system are current</p>
Co-ordinate/ perform change activities at transmission nodes	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. login to the transmission nodes and optimize signal parameters - power and transmission frequency to the designed levels</p> <p>PC2. optimize transmission capacity levels (number of STMs and E1s required and available capacity)</p>

TEL/N6214

Undertake upgrade, capacity augmentation and addition/ deletion of new nodes in Transmission network

	<p>PC3. ensure the software version of the transmission nodes is current, as per the details available from the NOC</p> <p>PC4. in case field support is required, ensure coordination with the field engineers to carry out change activities at transmission nodes</p> <p>PC5. ensure remote support from NOC/ control room is provided to the field team/ FM engineers while the change activities are carried out</p> <p>PC6. ensure completion of the requested change task as per requestor’s requirement</p> <p>PC7. ensure continuous monitoring of progress of change and notify change requestor of problems encountered if any</p> <p>PC8. abort change and implement contingency plan should the change plan not be realized without major disruption to network</p> <p>PC9. ensure compliance with the defined SLA for carrying out changes</p> <p>PC10. ensure unresolved faults/ instances of delays in resolution are escalated as per Company's policy</p>
<p>Test effectiveness & close activity</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. confirm effectiveness of the change process, by monitoring site's alarm status in co-ordination with the NOC team</p> <p>PC2. ensure completion of administrative jobs like site clearance, return of test equipments etc.</p>
<p>Health and Safety</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure compliance with site risk control, OHS, environmental and quality requirements as per company’s norms</p> <p>PC2. ensure that work is carried out in accordance to the level of competence and legal requirements</p> <p>PC3. ensure that hazards associated with the workplace that have not been previously controlled, are reported in accordance with appropriate procedures</p> <p>PC4. ensure compliance with all organizational security arrangements (like using valid ID cards) and approved procedures</p> <p>PC5. use and maintain protective equipment according to work requirements</p> <p>PC6. ensure availability of first aid box at site</p> <p>PC7. ensure escalation of safety incidents to relevant authorities as per guidelines</p>
<p>Report & Record</p>	<p>To be competent, the user/individual on the job must be able to:</p> <p>PC1. ensure all relevant parties (including NOC team, other supervisors) are notified of the results of the change management activities and sign-off is obtained</p>

	<p>from relevant personnel</p> <p>PC2. ensure that documents that are required to be updated are identified</p> <p>PC3. ensure completion of routine maintenance logs, activity logs and spare tracker within stipulated timelines</p> <p>PC4. ensure that documents are available to all appropriate authorities to inspect</p>
Knowledge and Understanding (K)	
<p>A. Organizational Context (Knowledge of the company / organization and its processes)</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. risk and impact of not following defined procedures/work instructions</p> <p>KA2. escalation matrix for reporting identified incidents, troubles and/ or emergencies e.g. system failures ,fire and power failures</p> <p>KA3. types of documentation in organization and importance of the same</p> <p>KA4. records to be maintained and implications of non-maintenance of the same</p> <p>KA5. process for obtaining sign-off post completion of the maintenance activities</p> <p>KA6. knowledge of spare management and repair & return process for faulty equipments</p> <p>KA7. SHE and OHS guidelines and regulations as per company’s norms</p> <p>KA8. protection equipments (anti-static bands, anti-static packaging, appropriate insulations) that are required to be used</p> <p>KA9. first aid requirements in case of electrical shocks, cuts, fall from height and other common injuries</p> <p>KA10. electrical and chemical related hazards and precautionary measures</p> <p>KA11. usage of fire safety equipments</p>

Technical Knowledge</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KB1. network topology like ring structure, daisy chain structure and their traffic handling capabilities and characteristics</p> <p>KB2. functionality of telecommunication network transmission nodes like transmission equipments (Multiplexers, Microwave radio - TDM and IP based); transmission medium (Optical and microwave), transmission technology (SDH and PDH)</p> <p>KB3. functionality of transmission media test equipment (Optical light meter, power meter, Optical Time Domain Reflectometer - OTDR)</p> <p>KB4. equipment specific O&M softwares like MiniLink for Ericsson, NEC Passo</p> <p>KB5. cables (RJ45, RS232, and Hi-Speed USB) to login to MMU/ IDU cards</p> <p>KB6. knowledge of Optical fiber characteristics like refraction, polarization, attenuation, dispersion</p> <p>KB7. bands in optical fibre and their usability, loss characteristics</p> <p>KB8. signal strength and quality KPIs – design values and margins</p> <p>KB9. transmission Network Monitoring System</p>

TEL/N6214

Undertake upgrade, capacity augmentation and addition/ deletion of new nodes in Transmission network

	<p>KB10. fresnel zone analysis (LOS survey) and microwave survey</p> <p>KB11. standard troubleshooting activities that are performed at transmission nodes</p>
Skills (S)	
A. Core Skills/ Generic Skills	Communication Skills
	The user/ individual on the job needs to know and understand how to:
	<p>SA1. liaise and coordinate with third party vendors</p> <p>SA2. communicate with supervisor</p> <p>SA3. communicate in the local language</p>
	Project Management Skills
	The user/individual on the job needs to know and understand how to:
	<p>SA4. prioritize and execute tasks in a high-pressure environment and handle high pressure situations</p> <p>SA5. handle multiple tasks and completing them successfully within due timelines</p> <p>SA6. use and maintain resources efficiently and effectively</p>
A. Core Skills/ Generic Skills	Analytical Skills
	The user/individual on the job needs to know and understand how to:
	<p>SA7. keep up to date with new technology</p> <p>SA8. interpret reports, readings and numerical data</p> <p>SA9. think through to address complex problems</p> <p>SA10. source technical information by researching enterprise website or manufacturer's technical documentation</p>
	Other Skills
	The user/individual on the job needs to know and understand how to:
B. Professional Skills	Equipment operating Skills
	The user/individual on the job needs to know and understand how to:
	<p>SB1. operate transmission equipments like Microwave (TDM and IP based) radio, multiplexers, antennas and work on SDH and PDH transmission technology</p> <p>SB2. operate equipment specific O&M softwares like MiniLink for Ericsson, NEC Passo</p>

TEL/N6214

*Undertake upgrade, capacity augmentation and addition/ deletion of new nodes
in Transmission network*

	<p>SB3. utilize appropriate fiber like single mode and multi mode optical fibre based on specific requirements</p> <p>SB4. utilize appropriate optical test equipments like OTDR, power meter, light meter based on test requirements</p> <p>SB5. connect appropriate login cables (RJ45, RS232, and Hi-Speed USB) to log on to the transmission nodes</p> <p>SB6. re-route traffic in case of link failure</p> <p>SB7. perform Fresnel zone/ Microwave survey and prepare survey reports in an appropriate manner</p> <p>SB8. provision STMs and E1s in appropriate way</p>
	<p>Technical interpretation skills</p>
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB9. interpret OTDR, power meter, light meter test results to localize faults</p> <p>SB10. interpret results of LOS/ Fresnel zone surveys</p> <p>SB11. analyze transmission performance reports and identify instances of signal attenuation/ fading</p> <p>SB12. interpret optical connectivity/ link testing results to ensure link margins</p> <p>SB13. analyze the impact on the network due to the change activity and develop appropriate plans</p>

TEL/N6214

*Undertake upgrade, capacity augmentation and addition/ deletion of new nodes
in Transmission network*

NOS Version Control

NOS Code	TEL /N6214		
Credits NSQF	6	Version number	1.0
Industry	Telecom	Drafted on	26/04/13
Industry Sub-sector	Network Managed Services	Last reviewed on	29/04/15

PERFORMANCE CRITERIA

Job Role : Transmission Engineer
Qualification Pack TEL/Q6203
Sector Skill Council : Telecom

- Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
- The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
- Individual assessment agencies will create unique question papers for theory and skill practical part for each candidate at each examination/training center.
- To pass the Qualification Pack, every trainee should score a minimum of 40% in every NOS and Overall 50% pass percentage.
- In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

			Total Mark (400+100)	Total of Sub Element	Out Of	Theory	Skills Practical	
1. TEL/N6212 (Coordinate preventive maintenance of Transmission nodes)	Obtain schedule & notify NOC	PC1. ensure maintenance of site folder containing site capacity, topology and spots (microwave frequency used)	100	20	3	3	0	
		PC2. obtain the preventive maintenance schedule and the corresponding checklist from the supervisors			3	3	0	
		PC3. obtain network reports of the previous day from OSS and review network performance on defined parameters			4	4	0	
		PC4. suggest appropriate changes to the planned maintenance schedule considering criticality, capacity, frequency of fading faults, configuration changes			5	5	0	
		PC5. assess the potential impact of the proposed maintenance on customers and network and plan for possible outage or deferral of maintenance			2	2	0	
		PC6. ensure Network Operating Centre (NOC) is notified prior to undertaking the maintenance activities			3	3	0	
	Arrange for tools and spares	PC1. ensure necessary tools and test equipments are available with the field team			5	1	0	1
		PC2. ensure that equipment specific software are installed in the laptop device of field team				1	0	1
		PC3. ensure that the software versions are current and ready to use				1	0	1
		PC4. ensure availability of spare hardware equipments like radio, microwave, fiber and raise request for spares, in case the same are not available				1	0	1
		PC5. ensure that faulty equipments are sent to logistics team for repair and replacement				1	1	0
	Conduct/ Co-ordinate maintenance activity	PC1. conduct/ coordinate performance of maintenance activities on periodic basis (monthly, quarterly, half yearly)			40	4	4	0
		PC2. obtain performance dump of the transmission nodes from the NOC team and monitor signal strength, CRCbit error percentage, and other KPIs				5	0	5
		PC3. optimize signal parameters to ensure that they stay within the designed values				8	0	8
		PC4. review media errors in transmission				2	0	2
		PC5. ensure adequacy of redundancy for critical network elements like - IN/ Core/ BSC/ VAS nodes				4	0	4
		PC6. ensure completion of maintenance activities like antenna re-alignment, checking of connectors of IF, RF cables at BSS location by coordinating with the FM engineers				10	0	10
		PC7. ensure remote support is provided to the field team/ FM engineers while the change activities are carried out				2	0	2
		PC8. ensure timely completion of maintenance activity by monitoring activities performed by the field engineers				3	0	3
		PC9. ensure compliance to enterprise policy while escalating instances of delays				2	2	0
	Test effectiveness & close activity	PC1. confirm effectiveness of the maintenance process, by monitoring site's alarm status in co-ordination with the NOC team			10	5	0	5
		PC2. ensure completion of administrative jobs like site clearance, return of test equipments				5	0	5
	Health and Safety	PC1. ensure compliance with site risk control, OHS, environmental and quality requirements as per company's norms			15	2	2	0
		PC2. ensure that work is carried out in accordance to the level of competence and legal requirements				2	0	2
		PC3. ensure that hazards associated with the workplace that have not been previously controlled, are reported in accordance with appropriate procedures				5	0	5
		PC4. ensure compliance with all organizational security arrangements (like using valid ID cards) and approved procedures				1	0	1
		PC5. use and maintain protective equipment according to work requirements				2	0	2
		PC6. ensure availability of first aid box at site				1	0	1
PC7. ensure escalation of safety incidents to relevant authorities as per guidelines		2	2	0				
Report & Record	PC1. ensure all relevant parties (including BSS/ BTS support engineer, NOC team, other supervisors) are notified of the results of the maintenance activities and the sign-off is obtained from relevant personnel	10	2	2	0			
	PC2. ensure that documents that are required to be updated are identified		2	2	0			
	PC3. ensure completion of routine maintenance logs, activity logs and spare tracker within stipulated timelines		3	3	0			
	PC4. ensure that documents are available to all appropriate authorities to inspect		3	3	0			
			100	41	59			
2. TEL/N6213 (Coordinate corrective maintenance/ fault management of transmission nodes)	Respond to Network Alarm/ NOC instructions	PC1. obtain alarm information from the NOC team and determine alarm severity, SLAs and the affected network elements	100	15	3	3	0	
		PC2. ensure understanding of nature of alarms, and provide information to/ seek advice from relevant parties to identify the problem and root-cause of the alarm			8	2	6	
		PC3. analyze network topology and prioritise actioning on alarms based on their service impact.			4	0	4	
	Arrange for tools and spares	PC1. ensure necessary tools and test equipments are available with the field team			5	1	0	1
		PC2. ensure that equipment specific software are installed in the laptop device of the field team				1	0	1
		PC3. ensure that the software versions are current and ready to use				1	0	1
		PC4. ensure availability of spare hardware equipments like radio, microwave, fiber and raise request for spares, in case the same are not available				1	0	1
		PC5. ensure that faulty equipments are sent to logistics team for repair and replacement				1	0	1
	Identify & rectify faults	PC1. ensure coordination with the field engineers for performance of fault correction activity at transmission nodes			45	6	0	6
		PC2. based on the alarm/ other indicators determine the fault details				5	5	0
		PC3. in case optical fiber faults, ensure coordination with optical NOC to rectify the fault				6	3	3
		PC4. ensure in coordination with the NOC team that traffic is re-routed in case of transmission system failures				6	0	6
		PC5. in case of non-fibre alarm coordinate with the field engineers to diagnose the root cause of alarm				6	2	4
		PC6. determine the options to rectify the fault and confirm with supervisors and fibre NOC if required				4	0	4
		PC7. ensure a contingency plan is in place to handle transmission system failures				5	0	5
		PC8. ensure timely completion of fault rectification by monitoring activities performed by the field engineers				3	0	3
		PC9. ensure compliance to enterprise policy while escalating unresolved faults/instances of delays				4	0	4
	Test effectiveness &	PC1. confirm effectiveness of the maintenance process, by monitoring site's alarm status in co-ordination with the NOC team			10	5	0	5

	close activity	PC2. ensure completion of administrative jobs like site clearance, return of test equipments		5	0	5
		PC1. ensure compliance with site risk control, OHS, environmental and quality requirements as per company's norms		2	2	0
		PC2. ensure that work is carried out in accordance to the level of competence and legal requirements		2	0	2
	Health and Safety	PC3. ensure that hazards associated with the workplace that have not been previously controlled, are reported in accordance with appropriate procedures	15	5	0	5
		PC4. ensure compliance with all organizational security arrangements (like using valid ID cards) and approved procedures		1	0	1
		PC5. use and maintain protective equipment according to work requirements		2	0	2
		PC6. ensure availability of first aid box at site		1	0	1
		PC7. ensure escalation of safety incidents to relevant authorities as per guidelines		2	2	0
	Report & Record	PC1. ensure all relevant parties (including BSS/ BTS support engineer, NOC team, other supervisors)		2	2	0
		PC2. ensure that documents that are required to be updated are identified	10	2	2	0
		PC3. ensure completion of routine maintenance logs, activity logs and spare tracker within		3	3	0
		PC4. ensure that documents are available to all appropriate authorities to inspect		3	3	0
				100	29	71
	Determine change/ configuration requirements	PC1. receive change requests from the relevant teams (NOC, change management, network planning team etc.)		2	2	0
		PC2. identify criticality and timelines for carrying out the changes		2	2	0
		PC3. develop work plan and identify dependencies if any	15	2	0	0
		PC4. assess the potential impact of the proposed activity and plan for possible outage condition or deferral of the activity		6	4	2
		PC5. ensure that Network Operating Centre (NOC) is notified prior to undertaking the change activities		3	3	0
	Arrange for tools and spares	PC1. ensure availability of necessary tools and test equipments with the field team		2	0	2
		PC2. ensure availability of spare hardware equipments like radio, microwave, fiber etc. and raise request for spares, in case the same are not available	5	3	2	3
		PC3. ensure that the login user id and password to the system are current		0	0	0
	Co-ordinate/ perform change activities at transmission nodes	PC1. login to the transmission nodes and optimize signal parameters - power and transmission frequency to the designed levels		5	5	0
		PC2. optimize transmission capacity levels (number of STMs and E1s required and available capacity)		10	5	5
		PC3. ensure the software version of the transmission nodes is current, as per the details available from the NOC		2	0	2
		PC4. in case field support is required, ensure coordination with the field engineers to carry out change activities at transmission nodes		5	0	5
		PC5. ensure remote support from NOC/ control room is provided to the field team/ FM engineers while the change activities are carried out		4	4	0
		PC6. ensure completion of the requested change task as per requestor's requirement		5	0	5
		PC7. ensure continuous monitoring of progress of change and notify change requestor of problems		5	0	5
		PC8. abort change and implement contingency plan should the change plan not be realized without major disruption to network		2	0	0
		PC9. ensure compliance with the defined SLA for carrying out changes		4	0	0
		PC10. ensure unresolved faults/ instances of delays in resolution are escalated as per Company's policy		0	0	0
	Test effectiveness & close activity	PC1. confirm effectiveness of the change process, by monitoring site's alarm status in co-ordination with the NOC team		0	0	0
		PC2. ensure completion of administrative jobs like site clearance, return of test equipments equipments etc.		0	0	0
		PC1. ensure compliance with site risk control, OHS, environmental and quality requirements as per company's norms		0	0	0
		PC2. ensure that work is carried out in accordance to the level of competence and legal requirements		2	0	0
	Health and Safety	PC3. ensure that hazards associated with the workplace that have not been previously controlled, are reported in accordance with appropriate procedures		5	0	0
		PC4. ensure compliance with all organizational security arrangements (like using valid ID cards) and approved procedures		1	0	0
		PC5. use and maintain protective equipment according to work requirements		2	0	0
		PC6. ensure availability of first aid box at site		1	0	0
		PC7. ensure escalation of safety incidents to relevant authorities as per guidelines		0	0	0
	Report & Record	PC1. ensure all relevant parties (including NOC team, other supervisors) are notified of the results of the change management activities and sign-off is obtained from relevant person		0	0	0
		PC2. ensure that documents that are required to be updated are identified	10	2	2	0
		PC3. ensure completion of routine maintenance logs, activity logs and spare tracker within stipulated timelines		3	3	0
