TEL/Q2300: Telecom Terminal Equipment Application Developer (Android)

Brief Job Description

The individual is responsible for designing and developing advanced customised applications for the android platform that can be used by various smartphones and/or tablets running on android operating system. The incumbent would create user interfaces, write business logic for events and activities defined by the applications, test the code for robustness, including edge cases, usability and general reliability, perform bug-fixing and improve applications performance.

Personal Attributes

The individual should be customer oriented, self-motivated, effective communicator and a team player with strong analytical and problem-solving skills. The individual should be able to apply practical judgement to successfully perform the assigned responsibilities under high pressure situations.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [TEL/N2300: Setup Android Application Development Environment with User Interface](#)
2. [TEL/N2301: Develop Android Value Added Services \(VAS\) Application](#)
3. [TEL/N2302: Test and Publish Android Application](#)
4. [TEL/N9101: Organise Work and Resources as per Health and Safety Standards](#)
5. [TEL/N9102: Interact Effectively with Team Members and Customers](#)

TEL/N2300: Setup Android Application Development Environment with User Interface

Description

This OS unit is about setting up the android application development environment and creating the user interface for android application.

Scope

The scope covers the following :

- Setup android application development environment
- Create android project
- Design and develop the android applications

Elements and Performance Criteria

Set up android application development environment

To be competent, the user/individual on the job must be able to:

- PC1.** list the various tools and software required for developing an Android Application
- PC2.** perform installation of Java Development Kit (JDK) and Integrated Development Environment (IDE) like Eclipse IDE, Android Studio etc. and android Software Development Kit (SDK) packages
- PC3.** configure android development tool and framework to create Android Virtual Devices (AVD)

Create android project

To be competent, the user/individual on the job must be able to:

- PC4.** interpret key features for various versions of the android operating system used in devices
- PC5.** interpret the project details as well as requirements and create a new android project in the recommended software
- PC6.** identify the role of files and folders like source code files (.src), android directories, generations, assets, resources etc. in the project

Design and develop the android application

To be competent, the user/individual on the job must be able to:

- PC7.** design the layout using the defined properties of the layout like width, height, background etc. in XML based on the requirements
- PC8.** develop various components of an android applications such as screen, views and groups, images etc.
- PC9.** develop interlinked activities and intents
- PC10.** create hierarchical code using concepts such as inheritance
- PC11.** apply styles and themes to the user activities
- PC12.** integrate different types of menus into the applications to build interactivity
- PC13.** create the code for various interactivities using User Interface (UI) elements/controls and for events

Qualification Pack

- PC14.** link the code to XML layout file using an activity
- PC15.** customise the app using specific user-defined/custom components, notifications, etc.
- PC16.** perform steps to add multimedia to the application and program it to use the android camera and location
- PC17.** perform testing of the functionality and UI of the app using different emulators

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types and characteristics of various mobile operating systems
- KU2.** implementation procedure of JDK and IDE
- KU3.** fundamentals of SDK and its tools
- KU4.** procedure to create AVD
- KU5.** components of android project and applications
- KU6.** components of user interface
- KU7.** types of layouts like absolute layout, linear layout, table layout, relative layout, frame layout and scroll
- KU8.** types of intent objects and filters in android
- KU9.** concept of activity and activity lifecycle
- KU10.** concept of style inheritance
- KU11.** fundamentals of styles and themes
- KU12.** Object Oriented Program (OOP) concepts in Java (Classes and Objects, Multi-threading, Inheritance, Abstract Window Toolkit (AWT), Networking etc.)

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret manual and other materials
- GS2.** prioritise tasks to achieve efficiency
- GS3.** communicate in the local language (preferable)
- GS4.** work systematically with attention-to-detail

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Set up android application development environment</i>	6	11	-	1
PC1. list the various tools and software required for developing an Android Application	2	4	-	1
PC2. perform installation of Java Development Kit (JDK) and Integrated Development Environment (IDE) like Eclipse IDE, Android Studio etc. and android Software Development Kit (SDK) packages	2	3	-	-
PC3. configure android development tool and framework to create Android Virtual Devices (AVD)	2	4	-	-
<i>Create android project</i>	8	12	-	3
PC4. interpret key features for various versions of the android operating system used in devices	2	4	-	1
PC5. interpret the project details as well as requirements and create a new android project in the recommended software	3	4	-	1
PC6. identify the role of files and folders like source code files (.src), android directories, generations, assets, resources etc. in the project	3	4	-	1
<i>Design and develop the android application</i>	21	32	-	6
PC7. design the layout using the defined properties of the layout like width, height, background etc. in XML based on the requirements	3	4	-	-
PC8. develop various components of an android applications such as screen, views and groups, images etc.	1	2	-	-
PC9. develop interlinked activities and intents	2	2	-	-
PC10. create hierarchical code using concepts such as inheritance	1	3	-	-
PC11. apply styles and themes to the user activities	1	2	-	1

TEL/N2301: Develop Android Value Added Services (VAS) Application

Description

This OS unit is about creating and managing databases, working with content providers, messaging services, e-mail services, networking services, location based services and creating customised android services.

Scope

The scope covers the following :

- Manage data
- Integrate messaging and networking activities
- Integrate location-based services
- Develop the android services

Elements and Performance Criteria

Manage data

To be competent, the user/individual on the job must be able to:

- PC1.** implement data persistence to prevent loss of data
- PC2.** load and share the user preferences
- PC3.** perform storage of data on cloud and on internal storage, external storage (SD Card) and static resources
- PC4.** apply the Structured Query Language (SQL) commands to select, insert, update or delete data in the database
- PC5.** execute steps to integrate the database with proper application
- PC6.** instruct content providers and resolvers to provide an interface to the application data

Integrate messaging and networking activities

To be competent, the user/individual on the job must be able to:

- PC7.** implement changes in layout, add Graphic User Interface (GUI) and create necessary code for sending and receiving Short Messaging Service (SMS)
- PC8.** send SMS using intent and also setup SMS receiving
- PC9.** implement changes in layout, add GUI and create necessary code for e-mail service
- PC10.** integrate application with Bluetooth technology, text files, binary data and access web services, if required
- PC11.** perform synchronous and asynchronous calls for integrated web services

Integrate location-based services

To be competent, the user/individual on the job must be able to:

- PC12.** create a Google Maps project
- PC13.** obtain the Google Maps Application Programming Interface (API) key and add to the application
- PC14.** display the map after adding markers and synchronise it to location

Qualification Pack

PC15. integrate geographical coding and reverse geocoding on map interface

PC16. deploy and run the application

Develop the android services

To be competent, the user/individual on the job must be able to:

PC17. interpret the application requirements to determine the type of service to be used

PC18. create the required service and implement the methods

PC19. execute various tasks such as long running tasks, repeated tasks, asynchronous tasks on a separate thread repeatedly

PC20. ensure to establish communication between an activity and a service and bind them

PC21. implement efficient data transfer to minimise battery drain

PC22. update User Interface (UI) from a runnable block

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. android application development process

KU2. database and data persistence tools and techniques

KU3. android local data storage techniques

KU4. process to create a database

KU5. concepts and application of SQL

KU6. types and application of content provider in android

KU7. usage of e-mails, SMS, and Bluetooth

KU8. concept of maps for android

KU9. features and working of the map

KU10. concepts of geo coding and reverse geo coding

KU11. fundamentals of services and background processing

KU12. fundamentals of networking

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and interpret manual and other materials

GS2. interpret application requirements

GS3. communicate in the local language (preferable)

GS4. make the application user friendly and pleasing to eyes

GS5. analyse and interpret problems and create codes

Qualification Pack

TEL/N2302: Test and Publish Android Application

Description

This OS unit is about testing and publishing the applications for various android devices.

Scope

The scope covers the following :

- Test and secure the android applications
- Publish the android applications

Elements and Performance Criteria

Test and secure the android applications

To be competent, the user/individual on the job must be able to:

- PC1.** understand, evaluate and decide upon the testing methodology
- PC2.** create different cases and scenarios for the purpose of testing
- PC3.** perform functional testing, compatibility and performance of the application with different mobile phones
- PC4.** carry out network testing to check connectivity parameters
- PC5.** perform User Interface (UI/UX) testing based on various parameters
- PC6.** implement best practices for application security
- PC7.** resolve any issues/problems associated with the application, network and user interface after troubleshooting
- PC8.** interpret the security checks and perform application security test

Publish the android applications

To be competent, the user/individual on the job must be able to:

- PC9.** organise the application for release on application store
- PC10.** ensure availability of Google licensing for the application developed
- PC11.** configure Google play store components for uploading the application in the play store console
- PC12.** deploy and publish the applications on android platform

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types of testing for applications
- KU2.** fundamentals and benefits of android application kit used in testing mobile applications
- KU3.** performance parameters used in application testing
- KU4.** security policies of android and the organisation commissioning the application
- KU5.** techniques for troubleshooting application problems

Qualification Pack

- KU6.** licensing policies of Google
- KU7.** fundamentals of services and background processing
- KU8.** fundamentals of networking

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret manual and other materials
- GS2.** prioritise tasks to achieve efficiency
- GS3.** work systematically with attention-to-detail

TEL/N9101: Organise Work and Resources as per Health and Safety Standards

Description

This OS unit is about planning work and following sustainable as well as healthy practices for safety and optimal use of resources.

Scope

The scope covers the following :

- Perform work as per quality standards
- Maintain safe, healthy and secure working environment
- Conserve material/energy/electricity
- Use effective waste management/recycling practices

Elements and Performance Criteria

Perform work as per quality standards

To be competent, the user/individual on the job must be able to:

- PC1.** keep workspace clean and tidy
- PC2.** perform individual role and responsibilities as per the job role while taking accountability for the work
- PC3.** record/document tasks completed as per the requirements within specific timelines
- PC4.** implement schedules to ensure timely completion of tasks
- PC5.** identify the cause of a problem related to own work and validate it
- PC6.** analyse problems accurately and communicate different possible solutions to the problem

Maintain safe, healthy and secure working environment

To be competent, the user/individual on the job must be able to:

- PC7.** comply with organisation's current health, safety, security policies and procedures
- PC8.** check for water spills in and around the work space and escalate these to the appropriate authority
- PC9.** report any identified breaches in health, safety, and security policies and procedures to the designated person
- PC10.** use safety materials such as goggles, gloves, ear plugs, caps, ESD pins, covers, shoes, etc.
- PC11.** avoid damage of components due to negligence in ESD procedures or any other loss due to safety negligence
- PC12.** identify hazards such as illness, accidents, fires or any other natural calamity safely, as per organisation's emergency procedures, within the limits of individual's authority
- PC13.** participate regularly in fire drills or other safety related workshops organised by the company
- PC14.** report any hazard outside the individual's authority to the relevant person in line with organisational procedures and warn others who may be affected

Qualification Pack

- PC15.** maintain appropriate posture while sitting/standing for long hours
- PC16.** handle heavy and hazardous materials with care, while maintaining appropriate posture
- PC17.** sanitize workstation and equipment regularly
- PC18.** clean hands with soap, alcohol-based sanitizer regularly
- PC19.** avoid contact with anyone suffering from communicable diseases and take necessary precautions
- PC20.** take safety precautions while travelling e.g. maintain 1m distance from others, sanitize hands regularly, wear masks, etc.
- PC21.** report hygiene and sanitation issues to appropriate authority
- PC22.** follow recommended personal hygiene and sanitation practices, for example, washing/sanitizing hands, covering face with a bent elbow while coughing/sneezing, using PPE, etc.

Conserve material/energy/electricity

To be competent, the user/individual on the job must be able to:

- PC23.** optimize usage of material including water in various tasks/activities/processes
- PC24.** use resources such as water, electricity and others responsibly
- PC25.** carry out routine cleaning of tools, machine and equipment
- PC26.** optimize use of electricity/energy in various tasks/activities/processes
- PC27.** perform periodic checks of the functioning of the equipment/machine and rectify wherever required
- PC28.** report malfunctioning and lapses in maintenance of equipment
- PC29.** use electrical equipment and appliances properly

Use effective waste management/recycling practices

To be competent, the user/individual on the job must be able to:

- PC30.** identify recyclable, non-recyclable and hazardous waste
- PC31.** deposit recyclable and reusable material at identified location
- PC32.** dispose non-recyclable and hazardous waste as per recommended processes

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** strategies pertinent to their field (such as internet searches, asking peers and managers, enrolling for courses and certifications, etc.) that can be used to pursue an advancement in their skills
- KU2.** key performance indicators for the new tasks
- KU3.** feedback processes and formats
- KU4.** timelines and goals as well as their relevance to work allocated
- KU5.** importance of quality and timely delivery of the product/service
- KU6.** escalation matrix and its importance, especially in case of emergencies
- KU7.** ways of time and cost management
- KU8.** rules/regulation for maintaining health and safety at workplace

Qualification Pack

- KU9.** meaning of hazard, different types of health and safety hazards found in the workplace, risks and threats based on the nature of work
- KU10.** relevant signage, warnings, labels or descriptions on equipment, etc. while carrying out work activities
- KU11.** procedures to report breaches in health, safety and security
- KU12.** organisation's procedures for different emergency situations and the importance of following the same
- KU13.** different methods of cleaning, disinfection, sterilization, and sanitization
- KU14.** significance of personal hygiene practice including hand hygiene
- KU15.** path of disease transmission
- KU16.** correct method of donning and doffing of PPE
- KU17.** ways of managing resources and material efficiently
- KU18.** common electrical problems and common practices of conserving electricity
- KU19.** categorization of waste into dry, wet, recyclable, non-recyclable and items of single-use plastics and use of different colours of dustbins
- KU20.** organisation's procedures for minimizing waste
- KU21.** waste management and methods of waste disposal
- KU22.** common sources of pollution and ways to minimize it

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** improve and modify work practices
- GS2.** complete tasks efficiently and accurately within stipulated time
- GS3.** develop skills and mastery of the technologies prevalent in the industry
- GS4.** write in at least one language and complete written work with attention to detail
- GS5.** utilize time and manage workload efficiently
- GS6.** read and comprehend instructions and documents
- GS7.** accept feedback in a constructive way
- GS8.** seek clarifications from superior about the job requirement
- GS9.** read and comprehend statutory documents relevant to safety and hygiene
- GS10.** refer all anomalies to the concerned persons
- GS11.** analyze situations and make appropriate decisions
- GS12.** decide the most suitable course of action for completing the task within resources

Qualification Pack

TEL/N9102: Interact Effectively with Team Members and Customers

Description

This OS unit is about interacting with superiors and colleagues as well as customers and other stakeholders in own or other work groups within as well as outside the organisation.

Scope

The scope covers the following :

- Interact effectively with superiors
- Interact effectively with colleagues and customers
- Respect differences of gender and ability

Elements and Performance Criteria

Interact effectively with superiors

To be competent, the user/individual on the job must be able to:

- PC1.** receive work requirements from superiors and customers and interpret them correctly
- PC2.** inform the supervisor and/or concerned person about any unforeseen disruptions or delays
- PC3.** participate in decision making by providing facts and figures, giving/accepting constructive suggestions
- PC4.** rectify errors as per feedback and ensure the errors are not repeated

Interact effectively with colleagues and customers

To be competent, the user/individual on the job must be able to:

- PC5.** comply with organisation's policies and procedures for working with team members
- PC6.** communicate professionally using appropriate mode of communication such as face-to-face, telephonic and written
- PC7.** respond to queries and seek/provide clarifications if required
- PC8.** co-ordinate with team to integrate work as per requirements
- PC9.** resolve conflicts within the team/with customers to achieve smooth workflow
- PC10.** recognize emotions accurately in self and others to build good relationships
- PC11.** prioritize team and organization goals above personal goals

Respect differences of gender and ability

To be competent, the user/individual on the job must be able to:

- PC12.** maintain a conducive environment for all the genders at the workplace
- PC13.** encourage appropriate behavior and conduct with people across gender
- PC14.** assist team members with disability in overcoming any challenges faced in work

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 70

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
